(54) MEASUREMENT REAGENT AND MEASUREMENT METHOD FOR QUARTZ RESONATOR

(57)Abstract:

PROBLEM TO BE SOLVED: To provide a measurement reagent and a measurement method capable of carrying out highly sensitive measurement even when a measurement object is a low molecular weight substance or a substance having an antibody combining site in only one place.

SOLUTION: An agglutination element comprises a recognition element having a specific combining ability to a substance to be measured fixed to an insoluble carrier, a competitive standard substance comprises a plurality of the substances to be measured combined with high molecular protein, and the measurement reagent comprises the quartz resonator.
